EDUCATION

Indian Institute of Engineering Science and Technology, Shibpur, India (September 2022 - July 2026)

Bachelor of Technology, Computer Science and Technology, GPA: 8.15

Courses: Algorithms, Computer Science Fundamentals, Theory of Computation, Database, OOP, Machine Learning

SKILLS SUMMARY

Languages: C++, Python, JavaScript, SQL, Bash, HTML, CSS, EJS

Frameworks: ExpressJS, Bootstrap, NodeJS

Libraries: React, STL, jQuery, APIs

Tools: Netlify, Render, GIT, PostgreSQL, MySQL, Postman, AWS, Pytorch, Tensorflow

Soft Skills: Leadership, Team Collaboration, Proactive Learning, Problem-Solving, Communication

EXPERIENCE

Research Intern under Professor Tamal Pal, IIST Shibpur (September 2024 - Present)

- Developed a web application that simulates floods using 2D models, leveraging an ANN model to **achieve 97% prediction accuracy** and visualizing flood impacts on a world map.
- Integrated real-time weather data for dynamic sea level simulations, enhancing forecast precision, and included daily news updates for comprehensive user insights.

Artificial Intelligence - Hybrid, 1stop(November 2024 - January 2025)

- Designed and implemented two AI neural network models, one for pet classification using image recognition techniques and another for landmark detection utilizing object detection algorithms
- Optimizing performance to achieve **up to 96% accuracy**.

PROJECTS

File Tracker System, Industrial Projects (December 2024 - Present)

- Developed a web application to manage and track files for the **Research and Consultancy Cell at IIST, Shibpur**, using EJS, CSS, Node.js, and Express.js, SQL
- Enabled the dean to set file processing paths for seamless member routing.
- Allowed faculty members to hold or dismiss files with valid reasons, enhancing flexibility in file handling.

Blog Posting Web Application (June 2024 - July 2024) Link

- Built a web application using **REST API**, EJS, Node.js, Express.js, SQL for managing blog content.
- Added features for user interaction, enabling individuals to share their daily activities and stories.

GeoFlood Predictor API (December 2024 - December 2024) Link Live API

- Created a Flask-based service API using REST architecture and a regression Artificial Intelligence model to predict the probability of floods at a specific location for the next 7 day.
- Use Open-Meteo for forecast the upcoming 1 weak weather report and past 2 weak weather and then the regression model predict the probability of flood.

ACHIEVEMENTS

- **LeetCode:** Solved **250+ problems** and achieved a **1600+ score** in contests. RISHABH-007/
- **Contest Rank:** Secured **2348th rank** in LeetCode Weekly Contest 422 (out of 27,000 participants globally). Secured **1928th rank** in Biweekly Contest 147 (out of 26,988 participants globally).
- **Coding Competition:** Achieved **3rd position** in CodeStrome, a coding competition organized by the department.
- **Open Source Contributions:** Successfully contributed to programs such as **GirlsScript Summer of Code 2024**, **Social Summer of Code 2024**, and **Hacktoberfest 2024**.

POSITIONS OF RESPONSIBILITY

Lead Thumbnails Designer for College Fest and Departmental Fest(2024-Present)

Active Member of the Publicity and Sponsorship Teams(2023-Present)
